

National Environmental Assessment Reporting System (NEARS)

Identifying Environmental Factors Contributing to Foodborne Illness Outbreaks

CDC's National Center for Environmental Health Objectives

Environmental Factors Contributing to Outbreaks

Environmental Factors Contributing to Outbreaks

Contributing Factors

Contamination

- Cross-contamination of ingredients
- Contact by an infectious/ill worker

Proliferation

- Improper cold holding due to malfunctioning equipment
- Improper cold holding due to improper procedure

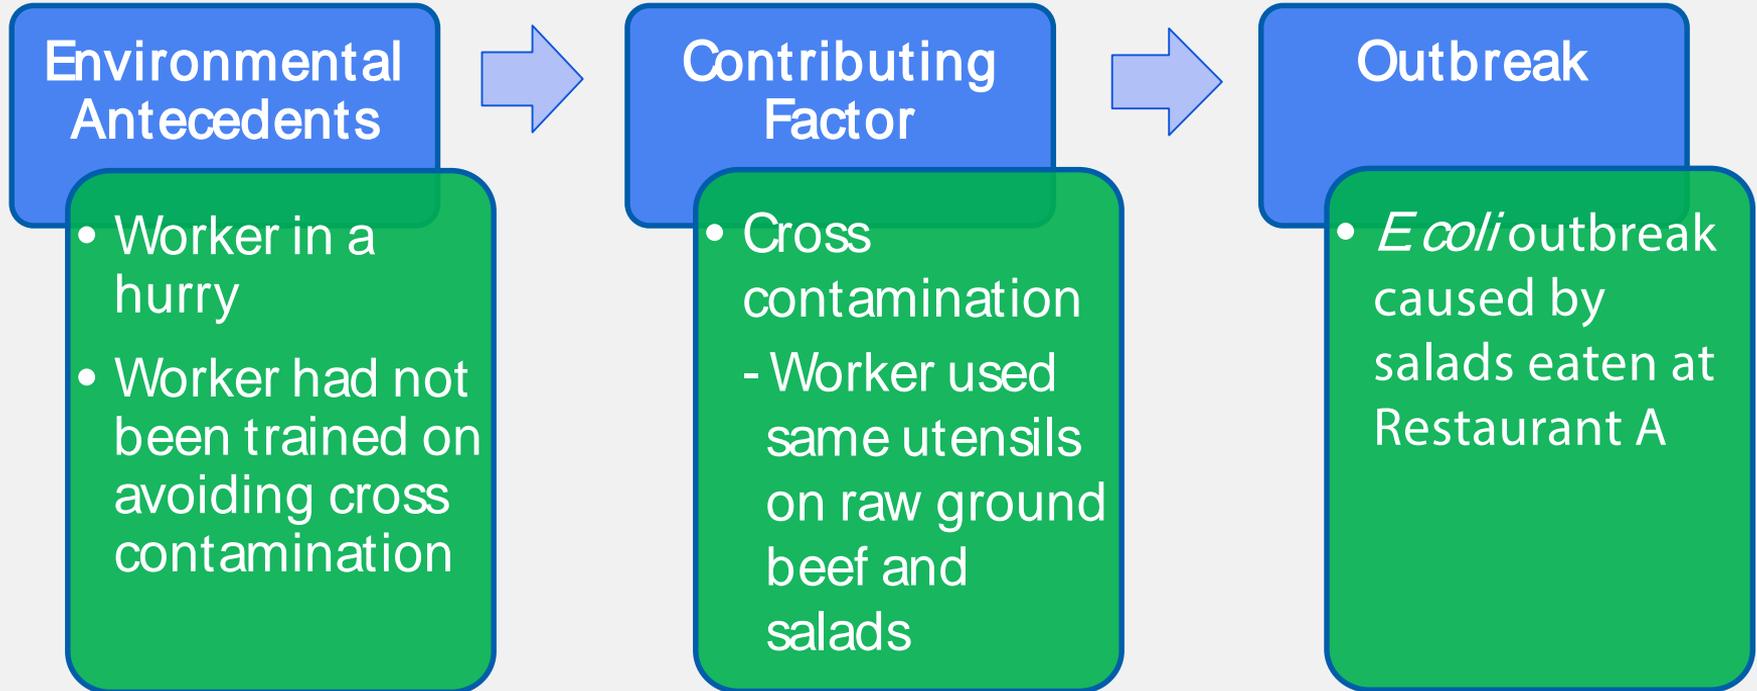

Survival

- Insufficient time/temp during reheating
- Insufficient time/temp during freezing

Environmental Antecedents

- People
- Processes
- Equipment
- Economics
- Food

Environmental Factors Contributing to Outbreaks

Outbreak Environmental Assessments

Describe how the environment contributes to the introduction and transmission of illness agents

Are conducted by environmental health program staff

Involve a thorough review of the processes and practices used with suspected food items

Are guided by known information about the outbreak (e.g., agent)

May include food flows, staff interviews, observations of food preparation, sampling

Generate recommendations for intervention

The Need to Improve Reporting of Environmental Assessment Data

- **Environmental assessment data are key to:**
 - Understand how and why outbreaks occur
 - Develop appropriate guidelines, policies and practices
 - Prevent future outbreaks
- **Engage food safety officials responsible for conducting environmental assessments**
- **Limited environmental assessment data reported at a national level**

Environmental Assessment Training

The screenshot displays an interactive training interface. On the left, a chef in a white uniform and black cap stands in a kitchen. A blue sidebar on the left contains a 'Question Category' list: 1. Tasks Performed by this FW, 2. Establishment Policies, 3. Food Safety Training, 4. Personal Health, 5. Personal Handwashing/Hygiene, and 6. Personal Use of Gloves. Below this, a performance dashboard shows 'Average question effectiveness' at 100% (green bar), 'Score' at 4% (grey dial), and '5 / 125 points'. A 'TIME REMAINING' display shows '9:20' and an 'END INTERVIEW' button. The main text asks, 'Thinking back about 5 days ago, what tasks did you perform?'. On the right, a refrigerator is shown with a digital display reading '58°F' and an 'OK' button. A task list for 'Left Beef Stew' includes: 'Take temperature', 'Get depth of stew', and 'Get additional info'. The refrigerator shelves are stocked with various items like watermelon, rice pilaf, orange juice, and soups.

Question Category

1. Tasks Performed by this FW
2. Establishment Policies
3. Food Safety Training
4. Personal Health
5. Personal Handwashing/Hygiene
6. Personal Use of Gloves

Thinking back about 5 days ago, what tasks did you perform?

Average question effectiveness 100%

Score 4%

5 / 125 points

TIME REMAINING 9:20

END INTERVIEW

Left Beef Stew [X]

- Take temperature
- Get depth of stew
- Get additional info

58°F

OK

Support of Environmental Assessments at the State and Local level

Development and launch of environmental assessment training

- Designed to improve environmental health programs' competency in conducting environmental assessments during outbreaks
- Over 5,000 people from federal, state, local government agencies have registered for the training
- Free, web-based, interactive, self-paced
- CEUs are available
- Participants are showing a 25 percentage point increase in pre to post test scores

Environmental Assessment Training

Module 1: Foundation Skills

- **Lesson 1: Your Assignment**
- **Lesson 2: Overview of Foodborne Illness Outbreak Environmental Assessments**
- **Lesson 3: Effective Interviewing Skills**
- **Lesson 4: Observation and Records Review**
- **Lesson 5: Environmental Sampling**
- **Lesson 6: Critical Thinking Skills**
- **Lesson 7: Organizing Assessment Information**
- **Lesson 8: Control Strategies and Conducting Actions**

Environmental Assessment Training

Anticipated Launch Date: January 2018

Module 2: Skill Building

- Lesson 1: Guided walkthrough of an environmental assessment for a fictitious *C. perfringens* outbreak linked to a private school cafeteria
- Lesson 2: Virtual environmental assessment of a fictitious *Salmonella* Enteritidis and *Salmonella* Pomona outbreak linked to a local catering establishment
- Lesson 3: Guided walkthrough of an environmental assessment for a fictitious *E. coli* O157:H7 outbreak linked to a grower and distributor of organic herbs
- Lesson 4: Virtual environmental assessment of a fictitious *Listeria* outbreak in a cheese plant

Module 3: Food Defense

- Lesson 1: Overview of food defense concepts
- Lesson 2: Overview of food defense planning

Collection and Analysis of Environmental Assessment Data at the National Level

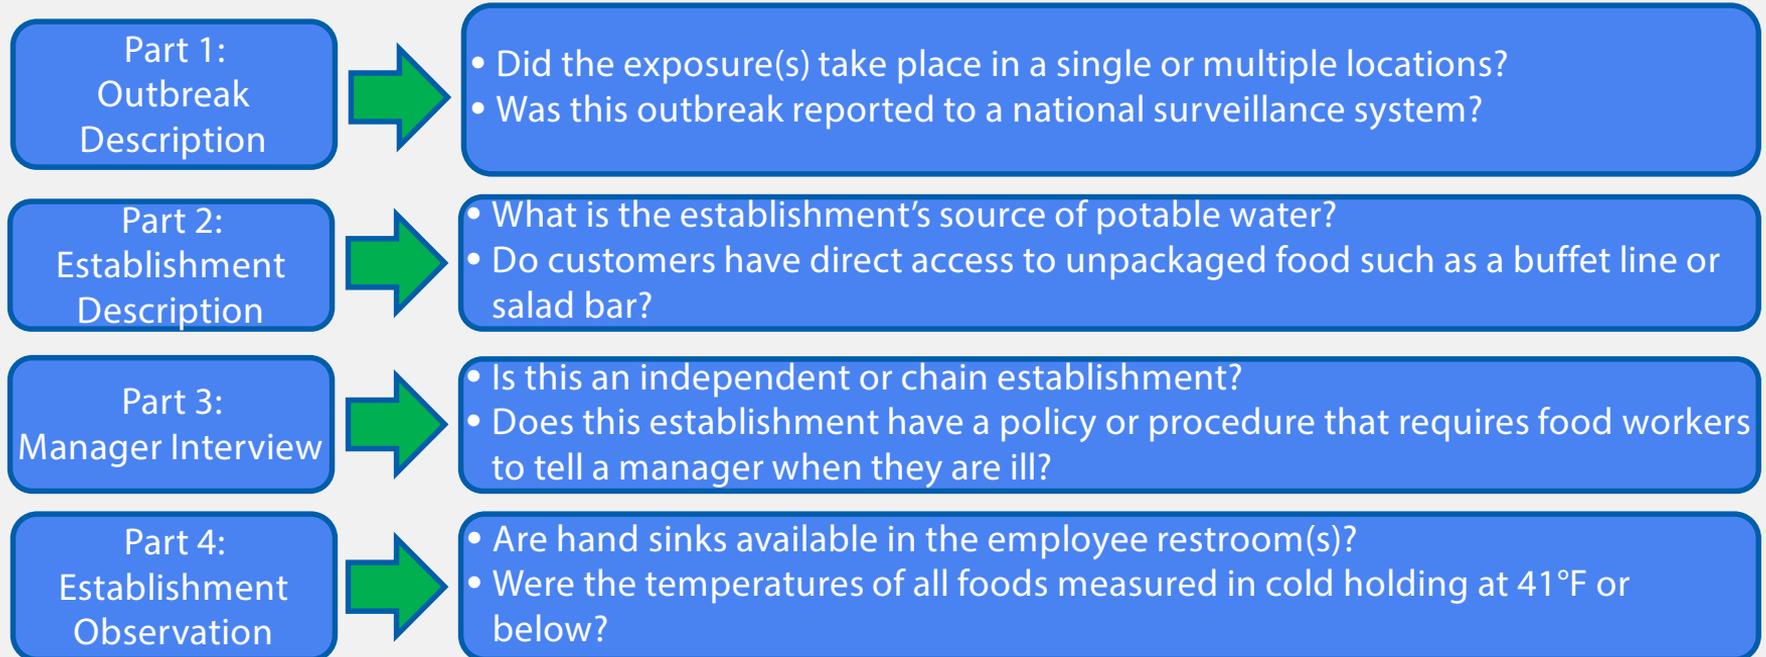

Development and launch of National Environmental Assessment Reporting System (NEARS)

- Companion surveillance system to the National Outbreak Reporting System (NORS)
- Repository for state and local programs to report data collected from their environmental assessments
- 27 state and local agencies are currently registered to begin reporting data into NEARS

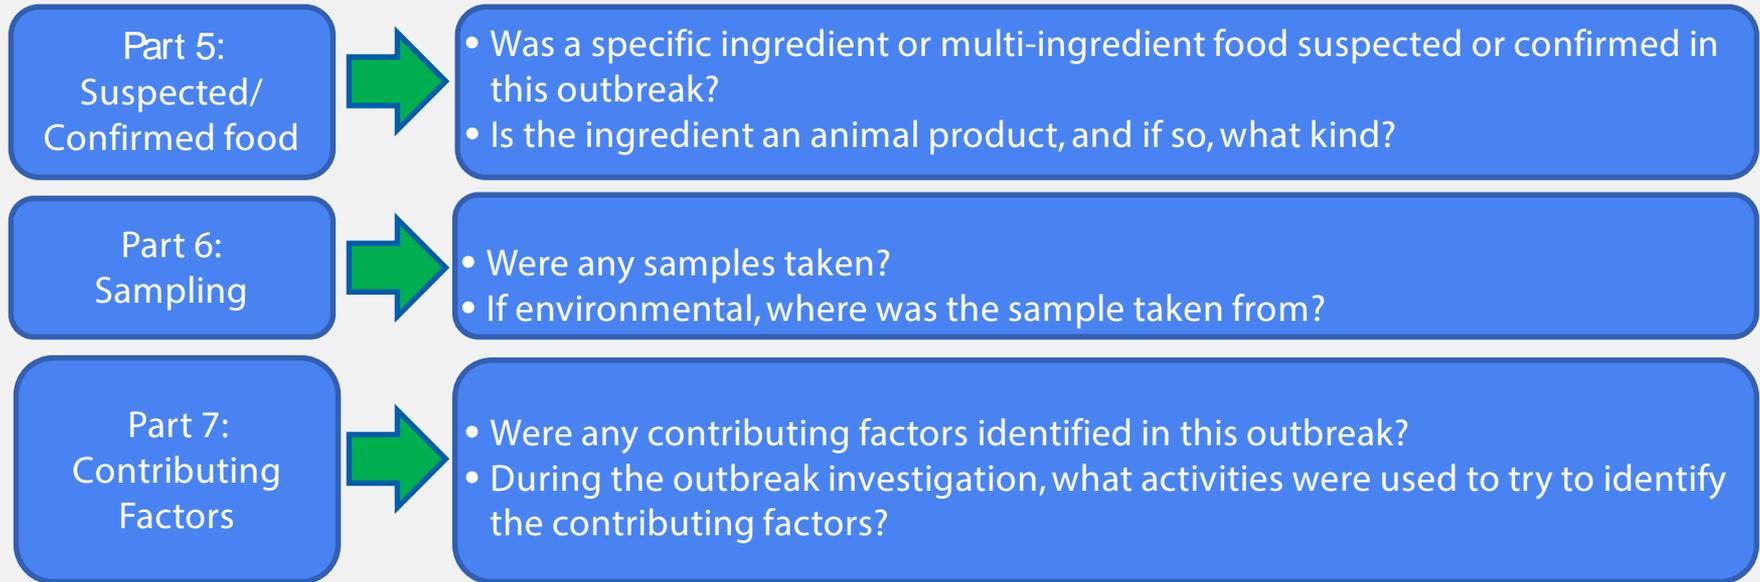

Collection and Analysis of Environmental Assessment Data at the National Level

Programs report data into NEARS on:

Collection and Analysis of Environmental Assessment Data at the National Level

Programs report data into NEARS on:

Short-term Benefits of NEARS Participation

Annual report from
CDC summarizing
your NEARS data

*Complements
FDA Standard 5
Requirements

Collaboration/
communication with
other states/localities
participating in
NEARS

Potential scientific
publication
opportunities

Ability to document
and track foodborne
outbreak response
data

CDC's National Environmental Assessment Reporting System (NEARS)

2015 Summary Report

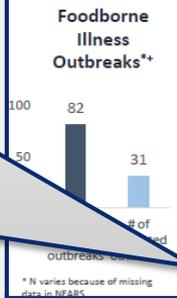

In 2015, a total of 114 outbreaks were reported to NEARS. This summary provides information on characteristics of those outbreaks and the establishments where the outbreaks occurred.

The data included in this summary were collected by NEARS participants in California; Connecticut; Davis County, Utah; Fairfax County, Virginia; Harris County, Texas; Minnesota; New York City; New York State; Rhode Island; Tennessee; and Wisconsin.

88%
outbreaks reported to NORS

Average # of Visits to Complete an Environmental Assessment
2 Visits

Outbreak Characteristics

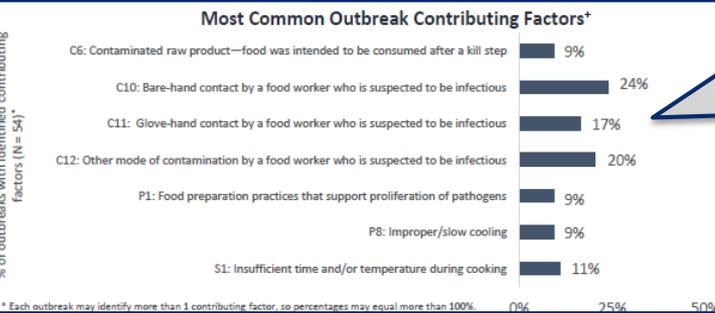

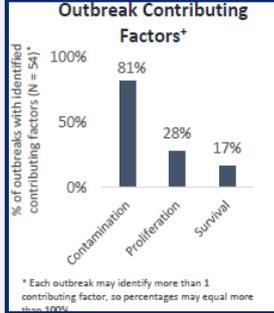

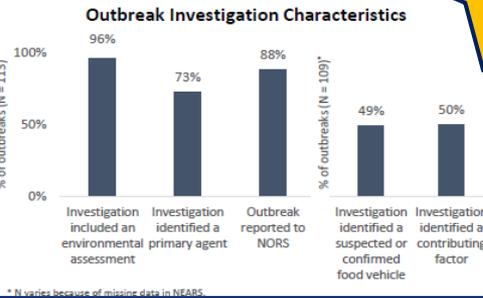

Outbreak Response

The average number of days between the date the outbreak establishment was identified for an environmental assessment and the date of the following activities with the outbreak establishment:

- 1st contact = 1 day (min = 0, max = 15)
- Establishment observation = 2 days (min = 0, max = 29)
- Manager interview = 14 days (min = 0, max = 121)

The average number of visits to the outbreak establishment needed to complete an environmental assessment = 2 visits (min = 1, max = 6)

Contributing Factors

C10
C11
C12

Long-term Benefits of NEARS Participation

Data to improve
foodborne
outbreak
response

What investigation characteristics lead to identification of environmental factors?

Do worker interviews make contributing factor identification more likely?

Data to improve
retail food
safety

What environmental antecedents are linked with specific contributing factors?

Is lack of ill worker policies linked with workers working while ill?

Summary

Support of environmental assessments at the state and local level

Collection and analysis of environmental assessment data at the national level

Improved identification of environmental factors contributing to foodborne illness outbreaks

Improved prevention and intervention

Improved food safety; fewer outbreaks

Begin Reporting Environmental Assessment Data to NEARS

- **Commit to conducting environmental assessments**
- **Complete NEARS Registration Form(s)**
 - State Notice and Acknowledgment of Local Participation
 - Notice of Participation Form
 - <https://www.cdc.gov/nceh/ehs/nears/registration.htm>
- **Complete CDC's free online environmental assessment training**
 - https://www.cdc.gov/nceh/ehs/elearn/ea_fio/index.htm
