

# Environmental Health

Dedicated to the advancement of the environmental health professional

Volume 82, No. 5 December 2019

## ABOUT THE COVER

There is no uniform nationwide method for organizing and delivering governmental environmental health services to residents of the U.S. and its territories, as illustrated

by the mosaic of tiles on this month's issue. The December cover article, "Environmental Health Systems and Delivery of Services in the United States and Its Territories," investigated environmental health organization and delivery methods among states and territories. The study aimed to provide a synthesized understanding of environmental health system delivery to assist in efforts to target and deliver workforce capacity building and professional development support.
