

# Environmental Health

Dedicated to the advancement of the environmental health professional

Volume 81, No. 10 June 2019

## ABOUT THE COVER

The *Journal* is very pleased to feature on this month's cover the published results from a groundbreaking initiative—Understanding the Needs, Challenges, Opportunities, Vision, and Emerging Roles in Environmental Health (UNCOVER EH). The Centers for Disease Control and Prevention, the National Environmental Health Association, and Baylor University partnered on this initiative to identify and describe key governmental environmental health workforce and practice elements. The UNCOVER EH initiative provides an understanding of the environmental health profession that has been lacking. Furthermore, the results provide a source of data to inform environmental health workforce development initiatives, improve the practice, and establish uniform benchmarks and professional competencies.
